

REMARKS

Amendments to the Drawings

The instant application was filed with informal drawings on March 19, 2004. Formal drawings were filed on July 27, 2004. A replacement FIG. 1 was filed on June 13, 2008, which corrected minor errors in the FIG. 1 filed on July 27, 2004.

On April 21, 2009, the Applicants' undersigned representative discovered that the Annotated and Replacement sheets for FIG. 1 filed on June 13, 2008 had not been based on the formal FIG. 1 filed on July 27, 2004. The Annotated and Replacement sheets for FIG. 1 filed on June 13, 2008 lacked, *inter alia*, annotation of features 104, 154, 136, feature 155, and text associated with the "Inner Surface Temp. Monitor" and "Minimal Wetted Length;" said information having been present on the as-filed FIG. 1 and the FIG. 1 submitted on July 27, 2004.

Applicants submit herewith two sets of Annotated Sheets that show changes made with respect to the FIG. 1 filed on July 27, 2004 and the FIG. 1 filed on June 13, 2008.

As compared to the Figure 1 filed on July 27, 2004, the enclosed Annotated sheet (stamped by OIPE on July 30, 2004) includes the following changes:

Rod 150 has been annotated with an arrow and numeral "150."
This feature is described in the *Specification* on page 12, paragraph 26, and is also annotated in the initial hand drawn Figure 1 submitted with the application as filed.

"Tagentially" has been corrected to become "Tangentially"

"Inlet Device 114" has been corrected to read "Lower Portion 114" to match the *Specification*, for example on page 8, paragraph 18, page 9, paragraphs 20, 21 and other instances.

Top end 126 (of insulated insert portion 112) has been annotated with an arrow and numeral "126." This feature is described in the *Specification* on page 9, paragraph 20.

As compared to the Replacement Figure 1 filed on June 13, 2008, the enclosed Annotated sheet includes the following changes:

Inlet manifold 104 has been re-annotated. This feature was annotated in the as-filed FIG. 1, and the FIG. 1 submitted on July 27, 2004, but was inadvertently omitted in the FIG. 1 filed on June 13, 2008.

Recessed portion 154 has been re-annotated. This feature was annotated in the as-filed FIG. 1, and the FIG. 1 submitted on July 27, 2004, but was inadvertently omitted in the FIG. 1 filed on June 13, 2008.

Spacer 155 has been re-added. This feature was shown in the as-filed FIG. 1, and the FIG. 1 submitted on July 27, 2004, but was inadvertently omitted in the FIG. 1 filed on June 13, 2008.

Reservoir 136 has been re-annotated. This feature was annotated in the as-filed FIG. 1, and the FIG. 1 submitted on July 27, 2004, but was inadvertently omitted in the FIG. 1 filed on June 13, 2008.

Text reciting "Inner Surface Temp. Monitor (T.C.) and "Minimal Wetted Length" and corresponding arrows have been re-added. This information was shown in the as-filed FIG. 1, and the FIG. 1 submitted on July 27, 2004, but was inadvertently omitted in the FIG. 1 filed on June 13, 2008.

Top end 126 (of insulated insert portion 112) has been annotated with an arrow and numeral "126." This feature is described in the *Specification* on page 9, paragraph 20.

The Applicants have submitted the present amendment after allowance and before the payment of the issue fee, and request that the Examiner enter the amendment pursuant to 37 CFR § 1.312 and MPEP § 714.16.

This amendment does not require additional search or examination since the amendment merely addresses formal matters without changing the scope of the claims. Nor does this amendment add new matter or change the breadth of the specification. The present amendment merely corrects an inadvertent error associated with a previously submitted corrected drawing, and clarifies the drawing with respect to the *Specification*. As such, the entry of the amendment is respectfully requested.

The Applicants believe no fees are due with this *Amendment*. If fees are due, however, the *Office* is authorized to charge deposit account 06-0600. The Applicants invite the Examiner to contact the undersigned with any further questions concerning this amendment. Early and favorable consideration is respectfully requested.

Respectfully submitted,

Mark Johnsgard et al.
